

Project Design Phase

Problem – Solution Fit

Date	Oct 2 nd 2026
Team ID	6ab8c330c23107aaaa72e953
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	

Project Name: Import Data Using Transform Maps

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- Solve complex problems in a way that fits the state of your customers.
- Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- Sharpen your communication and marketing strategy with the right triggers and messaging.
- Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- Understand the existing situation in order to improve it for your target group.

Problem – Solution Fit for Import Data Using Transform Maps

1. CUSTOMER SEGMENT(S)	6. CUSTOMER CONSTRAINTS	5. AVAILABLE SOLUTIONS
ServiceNow admins, developers and IT teams needing bulk data imports.	Large data volume, mismatched fields, invalid values and limited manual-entry time.	Manual entry, spreadsheets, custom scripts and Import Sets with Transform Maps.
2. JOBS-TO-BE-DONE / PROBLEMS	9. PROBLEM ROOT CAUSE	7. BEHAVIOUR
Import external records accurately and map source fields to target fields.	External data formats differ from ServiceNow tables and manual entry does not scale.	Users prepare files, upload them and verify imported records and errors.
3. TRIGGERS	10. YOUR SOLUTION	8. CHANNELS OF BEHAVIOUR
New CSV/Excel data, migration activity, bulk record creation or updates.	Use Import Sets for staging and Transform Maps for field mapping, matching and transformation.	File upload, scheduled import or integration-based data loading.
4. EMOTIONS / AFTER		
Faster imports, less repetitive work and greater confidence in data accuracy.
