

Project Development Phase

Model Performance Test

Date	Oct 2 nd 2026
Team ID	6ab8c330c23107aaaa72e953
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot																																										
1.	Model Summary	ServiceNow automation setup for employee data management using Tables, Fields, Import Sets, Transform Maps, Reports and a Dashboard. - Custom table Employee Test (u_employee_test) with 5 String fields: Employee ID, Employee Name, Email, Department, Location. - Import Set table Employee Import (u_employee_import) loaded from Sample Spreadsheet.xlsx. - Transform Map Sample Spreadsheet Import with Coalesce on Employee ID. 3 reports (Pie, Bar, List) shown on the Employee Analytics Dashboard. Note: Import Records – if the data matches correctly, the records will be created; otherwise it will show an error. In this project: Processed 15, inserts 15, errors 0.	< ≡ Table New record Submit A table is a collection of records in the database. Each record corresponds to a row in a table, and each field to a column. * Label Employee Test * Name u_employee_test Application Global Create module ☒ Columns Controls Application Access <table><tr><th>Column label</th><th>Type</th><th>Max length</th><th>Display</th></tr><tr><td>✕ Employee ID</td><td> String</td><td></td><td>false</td></tr><tr><td>✕ Employee Name</td><td> String</td><td></td><td>false</td></tr><tr><td>✕ Email</td><td> String</td><td></td><td>false</td></tr><tr><td>✕ Department</td><td> String</td><td></td><td>false</td></tr><tr><td>✕ Location</td><td> String</td><td></td><td>false</td></tr></table> Figure 1: Employee Test table with its 5 fields. = Table Transform Map Sample Spreadsheet Import Field Maps (5) Transform Scripts New <table><tr><th>Source field</th><th>Target field</th><th>Coalesce</th></tr><tr><td>u_name</td><td>u_employee_name</td><td>false</td></tr><tr><td>u_employee_id</td><td>u_employee_id</td><td>false</td></tr><tr><td>u_department</td><td>u_department</td><td>false</td></tr><tr><td>u_location</td><td>u_location</td><td>false</td></tr><tr><td>u_email</td><td>u_email</td><td>false</td></tr></table> 1 to 5 of 5 Figure 2: Transform Map field mapping (source → target). 2.	Accuracy	Import (Training) Accuracy - 100% First load: 15 of 15 records inserted, 0 errors. Validation Accuracy - 100% Employee Test list verified against the source sheets: 17 of 17 records correct (15 original, 2 updated, 2 new). Re-submitting the same sheet ignored 4 of 4 unchanged rows. <i>Accuracy = records processed without error ÷ records submitted.</i>	Progress NameImportProcessor StateComplete Completion codeSuccess MessageProcessed: 15, inserts 15, updates 0, errors 0, empty and ignored 0, ignored errors 0 (0:00:01.368) Next steps... Import sets Go to the import sets for this data load Loaded data Go to the newly imported data inside the staging table: u_employee_import Create transform map Create a transform map for the newly staged data Import log View the import log Figure 3: Import result – 15 processed, 0 errors. ≡ ▾ Transform Histories <table><thead><tr><th>Started</th><th>State</th><th>Set</th><th>Import set table</th><th>Total</th><th>Inserts</th><th>Updates</th><th>Ignored</th><th>Skipped</th><th>Errors</th></tr></thead><tbody><tr><td>2026-01-19 11:15:13</td><td>● Complete</td><td>ISSET0010001</td><td>Employee Import [u_employee_import]</td><td>15</td><td>15</td><td>0</td><td>0</td><td>0</td><td>0</td></tr><tr><td>2026-01-29 03:47:37</td><td>● Complete</td><td>ISSET0010003</td><td>Employee Import [u_employee_import]</td><td>4</td><td>2</td><td>2</td><td>0</td><td>0</td><td>0</td></tr><tr><td>2026-01-29 05:39:36</td><td>● Complete</td><td>ISSET0010004</td><td>Employee Import [u_employee_import]</td><td>4</td><td>0</td><td>0</td><td>4</td><td>0</td><td>0</td></tr></tbody></table> Figure 4: Transform History for the three loads. 3.	Confidence Score (Only Yolo Projects)	Not applicable – this is not a YOLO / object-detection project, so there is no class detected or confidence score. Equivalent record-matching check (Coalesce on Employee ID): • 2 of 2 changed rows matched their existing Employee ID and were updated. • 2 of 2 new Employee IDs had no match and were inserted. • 4 of 4 unchanged rows were matched and ignored; 0 duplicates created.	= Table Transform Map Sample Spreadsheet Import Field Maps (5) Transform Scripts Source field u_name u_employee_id u_department u_location u_email Target field u_employee_name u_employee_id u_department u_location u_email Coalesce false true false false false New 1 to 5 of 5 Figure 5: Coalesce = true on u_employee_id.
