2.	Data Preprocessing	- Sheet number 1, Header row 1 used while loading the file. - Import Set table auto-created: Employee Import (u_employee_import). - Transform Map “Sample Spreadsheet Import” created; <i>Auto Map Matching Fields and Mapping Assist</i> used to map the 5 fields: u_name → u_employee_name, u_employee_id → u_employee_id, u_department → u_department, u_location → u_location, u_email → u_email. - Coalesce on Employee ID to prevent duplicates. - Empty / ignored rows - 0, errors - 0.  Figure 2: Load Data form.  Figure 3: Field Maps (5).
3.	Utilization of Filters	List filters: column search on Department / Location - e.g. Department = Salesforce returns 4 of the 17 records. - Sorting on Employee ID (ascending). Report condition: All (no condition) for the three reports. Group by filters: Department and Location. - Dashboard Share option can restrict access by Users, Groups and Roles.  Figure 4: Department filter applied (Salesforce - 4 records).

S.No.	Parameter	Screenshot / Values
4.	Calculation fields Used	• Aggregation - COUNT of records grouped by Department: ServiceNow 11 (64.71%), Salesforce 4 (23.53%), Aiml 2 (11.76%). • Aggregation - COUNT grouped by Location: Hyderabad 16, Chennai 1. • Coalesce field: u_employee_id used as the matching key (insert vs update vs ignore). <i>ServiceNow reports use built-in aggregations instead of Tableau calculated fields.</i> Employees by Department Employees by Location ServiceNow = 11 (64.71%) Salesforce = 4 (23.53%) Aiml = 2 (11.76%) Figure 5: COUNT by Department (Pie) and COUNT by Location (Bar).
5.	Dashboard design	No of Visualizations / Graphs - 3 Dashboard: Employee Analytics Dashboard - Employees by Department - Pie chart - Employees by Location - Bar chart - Employee List Report - List Reports were added through Share → Add to Dashboard; the dashboard background colour can be configured. Figure 6: Employee Analytics Dashboard.
6.	Story Design	No of Visualizations / Graphs - 3 Story flow (ServiceNow has no separate Story feature, so the dashboard flow is used): Spreadsheet → Import Set → Transform Map → Employee Test → Reports / Dashboard. Reading order: record-level detail (List) → distribution by city (bar) → share by team (pie). Story: record-level detail (list) → distribution by city (bar) → share by team (pie) Figure 7: End-to-end data story for the project.
