Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	

Project Overview:

Project Name: Import Data using Transform Maps (Spreadsheet)

Project Description: Bulk employee data received as an Excel spreadsheet is loaded into ServiceNow through an Import Set (staging table) and moved to the custom table Employee Test using a Transform Map. Coalesce on Employee ID prevents duplicates, and reports plus a dashboard give visibility into the data.

Project Version: 1.0

Testing Period: Oct 2nd 2026

Testing Scope:

Features and functionalities tested:

- Custom table creation (Employee Test) with 5 String fields
- Load Data / Import Set table (Employee Import)
- Transform Map creation, field mapping and Transform execution
- Coalesce on Employee ID (update vs insert vs ignore)
- Reports (Pie, Bar, List) and the Employee Analytics Dashboard

User stories / requirements tested:

- As an administrator, I can import employee data from a spreadsheet so that records are created in ServiceNow.
- As an administrator, I can re-import the same data without creating duplicates, and changed data updates existing records.
- As an HR user, I can view employees by department and location and see the full list on one dashboard.

Testing Environment:

URL/Location: ServiceNow instance (Application scope: Global) – instance URL not recorded in this document

Credentials (if required): System Administrator account – not recorded in this document

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Create the custom table Employee Test	1. Go to Tables → Create New. 2. Label: Employee Test, Name: u_employee_test. 3. Add 5 String fields in Form Layout and Save.	Table is created and the form shows Employee ID, Employee Name, Email, Department and Location.	Table created; all 5 fields visible on the form.	Pass
TC-002	Load spreadsheet into an Import Set table	1. System Import Sets → Load Data. 2. Label: Employee Import; file: Sample Spreadsheet.xlsx. 3. Sheet 1, Header row 1 → Submit.	State Complete / Success; 15 rows staged in u_employee_import.	Processed 15, inserts 15, errors 0.	Pass
TC-003	Create Transform Map and auto-map fields	1. Click Create Transform Map. 2. Name: Sample Spreadsheet Import; target: Employee Test. 3. Run Auto Map Matching Fields / Mapping Assist.	5 source fields mapped to the 5 target fields.	Field Maps (5) created correctly.	Pass
TC-004	Run the Transform and validate records	1. Open Transform Map → Transform. 2. Click Transform. 3. Open Employee Tests.	Transformation succeeds and 15 records appear.	Transformation complete - Success; 1 to 15 of 15.	Pass
TC-005	Personalize list columns	1. Open Personalize List Columns. 2. Order: Employee ID, Name, Email, Department, Location. 3. Click OK.	List shows the columns in the chosen order.	Columns displayed in the required order.	Pass
TC-006	Enable Coalesce on Employee ID	1. System LDAP → Transform Maps. 2. Open Sample Spreadsheet Import → Field Maps. 3. Set u_employee_id Coalesce = true and Save.	Coalesce shows true for u_employee_id.	Coalesce = true on u_employee_id.	Pass
TC-007	Import changed and new data	1. Load the 4-row sheet into existing table Employee Import. 2. Run Transform. 3. Check Transform History and Employee Tests.	2 updates and 2 inserts; no duplicates.	Total 4, Inserts 2, Updates 2. SB-0004 → Ajay; SB-0010 → test18@gmail.com; SB-0016, SB-0017 added.	Pass
TC-008	Re-submit the same sheet (negative / duplicate scenario)	1. Load the same sheet again. 2. Run Transform with the same map. 3. Check Transform History.	No inserts or updates; rows ignored.	Total 4, Inserts 0, Updates 0, Ignored 4.	Pass
TC-009	Create the 3 reports	1. Reports → New. 2. Create Employees by Department (Pie), Employees by Location (Bar) and Employee List Report (List). 3. Run and Save each.	Reports render with correct data.	Pie 11 / 4 / 2; Bar Hyderabad 16, Chennai 1; List 17 rows.	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-010	Open the dashboard form (access control check)	1. Search PA_DASHBOARDS.FORM. 2. If it does not open, enable Admin overrides on the pa_dashboards create ACL and Update. 3. Open the form again.	Form opens only when Admin overrides is true.	Form opened after Admin overrides was enabled.	Pass
TC-011	Create the dashboard and add reports	1. Name: Employee Analytics Dashboard; Save. 2. For each report: Share → Add to Dashboard → Add.	All 3 reports are shown on the dashboard.	Employee List Report, Employees by Location and Employees by Department displayed.	Pass
TC-012	Dashboard sharing options	1. Open the dashboard. 2. Click Share and review Users, Groups and Roles.	Access can be restricted by users, groups and roles.	Share panel shows “This dashboard hasn’t been shared with anyone”; options available.	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Dashboard form (PA_DASHBOARDS.FORM) did not open for creating a dashboard.	1. Search PA_DASHBOARDS.FORM. 2. Try to create a new dashboard. 3. Access is blocked until the ACL is changed.	Medium	Closed	Fixed by enabling Admin overrides on the pa_dashboards create ACL and updating the record.
BG-002	Department value inconsistent after re-import: “Servicenow” (SB-0004, SB-0010) vs “ServiceNow” (other rows).	1. Load the 4-row sheet. 2. Run Transform. 3. Open Employee Tests and compare Department values.	Low	Open	Standardise the spelling in the source sheet or use a choice list / transform script to normalise the value.
BG-003	Employee name changed from “Ravi Teja” to “Raviteja” for SB-0010 although only the email was meant to change.	1. Compare the first sheet and the 4-row sheet for SB-0010. 2. Run Transform. 3. Check Employee Name.	Low	Open	Confirm the intended name in the source sheet; the update load overwrote the name.

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
