

Functional & Performance Testing Template

Model Performance Test

Date	Oct 2nd 2026
Team ID	6ab8c330c23107aaaa72e953
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Data load validation (spreadsheet import)	Open System Import Sets → Load Data. Create table “Employee Import”, choose Sample Spreadsheet.xlsx, Sheet 1, Header row 1, click Submit.	Import Set table u_employee_import is created and the load completes with Success.	State Complete, Completion code Success. Processed 15, inserts 15, errors 0.	Pass
FT-02	Field mapping validation	Create Transform Map “Sample Spreadsheet Import” (source u_employee_import, target u_employee_test). Run Auto Map Matching Fields / Mapping Assist.	All 5 source fields are mapped to the matching target fields.	Field Maps (5): name → employee_name, employee_id, department, location, email.	Pass
FT-03	Data transformation (initial load)	Open Transform Map → Transform, select import set ISET0010001 and click Transform.	15 records are created in Employee Test.	Transformation complete – Success. Employee Tests shows 1 to 15 of 15.	Pass
FT-04	Coalesce – update and insert	Set Coalesce = true on u_employee_id. Load the 4-row sheet (2 changed rows, 2 new rows) into the existing Employee Import table and run Transform.	2 existing records updated, 2 new records inserted, no duplicates.	Total 4, Inserts 2, Updates 2, Errors 0. SB-0004 name = Ajay; SB-0010 email = test18@gmail.com; SB-0016 and SB-0017 added (17 records).	Pass
FT-05	Duplicate prevention	Load the same 4-row sheet again to the same Transform Map and run Transform.	No new records and no changes.	Total 4, Inserts 0, Updates 0, Ignored 4. Record count stays at 17.	Pass
FT-06	Report generation	Create reports on Employee Test: Pie (Group by Department, Count), Bar (Group by Location, Count), List (5 columns). Run and Save.	Charts render with correct counts.	Pie: ServiceNow 11, Salesforce 4, Aiml 2. Bar: Hyderabad 16, Chennai 1. List shows 17 rows.	Pass
FT-07	Dashboard creation and access	Enable Admin overrides on the pa_dashboards create ACL, open PA_DASHBOARDS.FORM and save “Employee Analytics Dashboard”.	Dashboard form opens and the dashboard is created.	Form opened after Admin overrides = true; dashboard created.	Pass

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-08	Add reports to dashboard	Open each report → Share → Add to Dashboard → select Employee Analytics Dashboard → Add.	All 3 reports appear on the dashboard.	List, Bar and Pie widgets displayed on the dashboard.	Pass
PT-01	Import response time	Load Sample Spreadsheet.xlsx and read the time shown in the Progress message.	Should be under 3 seconds.	First load (15 rows): 0:00:01.368. Update load (4 rows): 0:00:00.040.	Pass
PT-02	Transform speed test	Run Transform on the import sets and check Run time in Transform History.	Transform should finish without delay.	4-row update load: 1 second. Repeated load (4 ignored): 0 seconds.	Pass
PT-03	Repeated file load test	Submit the same Excel file repeatedly to the same Transform Map.	Should work smoothly without errors or duplicate records.	Errors 0 on every run; no duplicates created.	Pass
PT-04	Dashboard loading test	Open Employee Analytics Dashboard with 3 widgets and 17 records.	All widgets load without errors.	List, Bar and Pie widgets rendered correctly.	Pass
